		Sticker	183 - Non Microwaveable	TBC
		Closed Box	JLPS014	44mm x 19mm

Guidance

- 'On metal' tags are used for products containing metal elements as it interferes with the RFID tag. This includes foiling on the packaging or the item containing any metal elements itself including glitter, metallic thread or beauty products with certain ingredients.
- Please use the image guidance for guidance on how and where to attach your RFID tag to your packaging / product.
- PEAN labels are the type where the price is included on the label.
- **It is very important that you follow the RFID tag type suggested.**
Microwaveable products: *Using the correct, certified RFID tag for microwaveable products is essential for safety and functionality. RFID tags contain small metal components that, if not specifically designed as microwave-safe, can heat up, spark, or even ignite, posing a fire risk and damaging the product, appliance or user. Adherence to specific, product-category-based RFID guidelines and certifications is critical to maintain safety standards and regulatory compliance.*

Sticker - Application Guidance

Microwaveable

183 - Non Microwaveable

Tag type - Microwaveable or 183 - Non Microwaveable
